### **DETAILED ACTION**

The following rejection under 35 U.S.C. 101 is made according to the *Interim Guidelines for Examination of Patent Applications for Patent Subject Matter Eligibility*, published in the Official Gazette on 22 November 2005.

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

Claims 16-19,22-28,30-33 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

In order for claims to be directed to statutory subject matter, under 35 U.S.C. 101, the claimed invention must provide a practical application, i.e. it must result in a physical transformation or provide a useful, concrete, and tangible result. Regarding Claims 16-19,22-28,30-33, the end result of the methods recited is that a target frequency is "calculated." This does not appear to be any kind of physical transformation, and while it may be useful and concrete, does not appear to be a tangible result (e.g. "displaying tuning information based upon said calculated target frequency ...").

### ***Double Patenting***

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent

Art Unit: 2837

and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 16,17,20,21 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1,1,5,9 of U.S. Patent No. 6,613,971. Although the conflicting claims are not identical, they are not patentably distinct from each other because of a slight difference in wording.

Claims 29,34-40 are allowed.
